for 25 years.

A. taught B. teaches C. teaching D. teach

[2] Read the following passage and answer True or False:

Healthy Food

Healthy food is very important for our bodies and minds. It gives us the energy we need to study, play, and do our daily activities. Eating healthy food helps us grow strong and keeps our body working properly. There are many types of healthy food such as fruits, vegetables, milk, eggs, fish, and whole grains. These foods contain vitamins and nutrients that protect us from illness.

It is important to eat a balanced diet every day. This means we should eat different kinds of food in the right amounts. We should also avoid eating too much fast food, fried food, and sugary snacks because they can cause health problems like obesity and tooth decay. Drinking enough water is very important because it helps our body stay fresh and active.

In addition, healthy food improves our concentration and helps us do better in school. Students who eat healthy meals can focus more and feel more energetic during the day. Parents and schools should encourage children to choose healthy meals and develop good eating habits from a young age.

In conclusion, healthy food is the key to a strong and happy life. By eating well and making good choices, we can protect our health and enjoy a better future.

Mark (T) for True and (F) for False:

1- Healthy food helps us do daily activities.		
2- A balanced diet means eating only one type of food.
